

# UX Design Storyboard

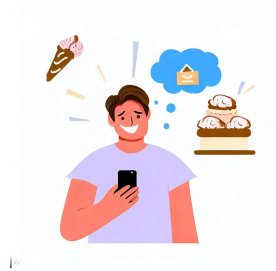

Scenario: "A user-friendly food delivery app that overcomes language barriers, enabling Joseph to effortlessly order bakery items from local bakeries."

*Joseph opens the food delivery app on his smartphone.*

*He browses bakery options available in his neighborhood.*

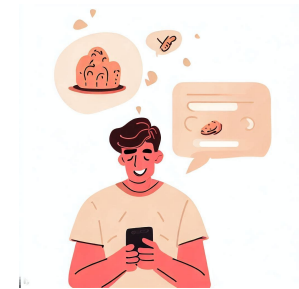

*He selects his desired bakery items and adds them to his cart.*

*He proceeds to the checkout, where he can view his order summary and apply any discounts.*

*Joseph chooses a delivery time that suits his schedule.*

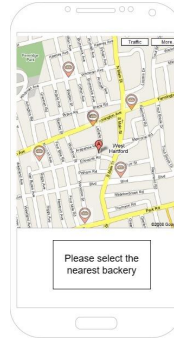

*He receives a confirmation message with the expected delivery time and feels relieved and excited.*
